INSTALLATION GUIDE

CREATE YOUR OWN - LIVING GREEN WALL

Easy | Sustainable | Beautiful

4 Stacking - Vertically & Horizontally

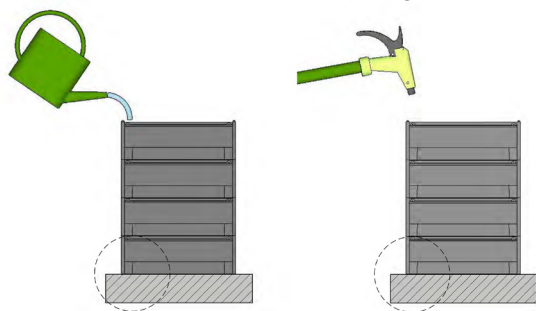

Insert stacking clips at each end of the trough and stack throughs vertically

Connect horizontally using joining clips

5 Irrigation - Manual Watering

PlantBox is watered from the top left hand side of each column. Once each water reservoir is full, water cascades into the next trough.

1 Using a watering can or hose, pour water into the filter on left side of the top **PlantBox** in each column of your living wall

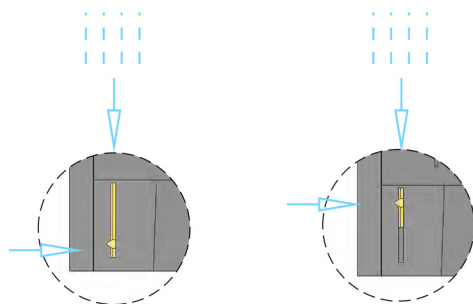

2 Continue filling until the water level indicator in the bottom trough of each column reaches **F (Full)**

3 Irrigate each column

Water level indicator shows water level in each trough
